

AI That Works For Law Firms

Stridon

Turning AI access into organisational advantage

Most law firms understand the potential of AI. The challenge is not access to technology. It is creating the conditions that allow people to use it confidently, responsibly and consistently in the work that matters. Stridon's Copilot Success Roadmap helps firms move beyond experimentation and isolated success stories. It provides a structured route from readiness and proof through to firmwide adoption, continuous improvement and long-term organisational capability.

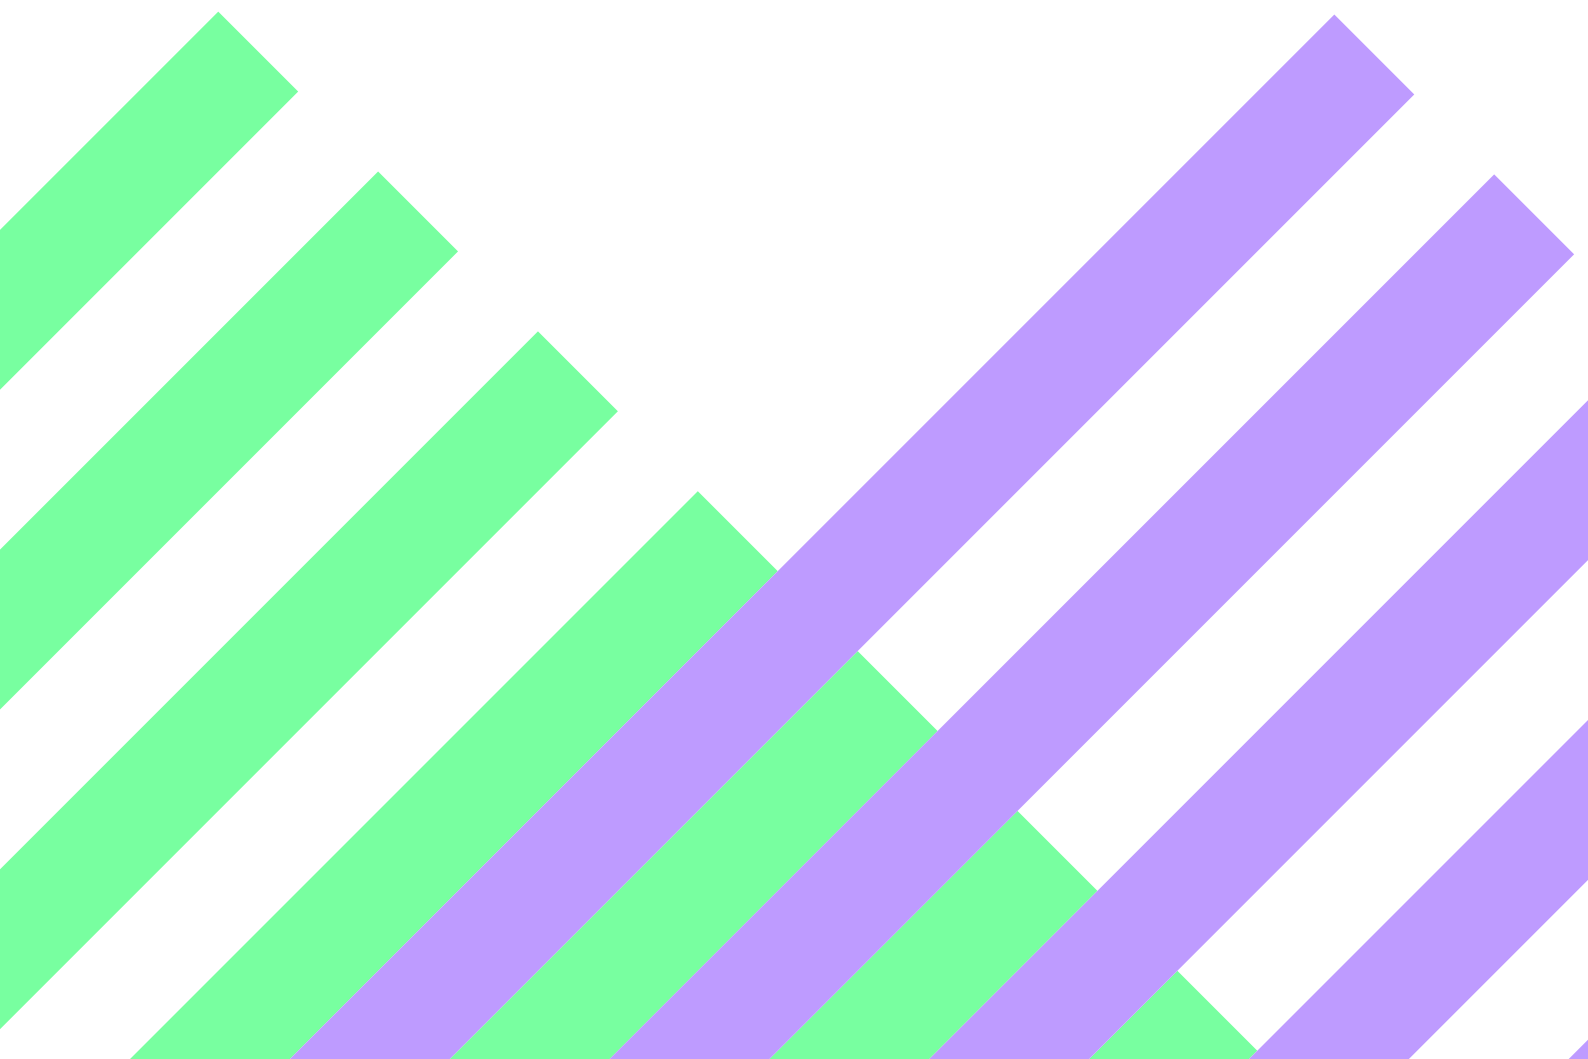

Successful AI adoption is not primarily a technology challenge. It is a people, culture and organisational capability challenge.

Why this matters

AI adoption in law firms is accelerating, but many firms are still struggling to turn interest into consistent, confident use. Choosing to deploy Microsoft 365 Copilot is only the start.

Sustainable value only emerges when firms create the conditions for success: a clear vision and strategy, pragmatic governance, and visible executive sponsorship that enables people across the entire organisation to understand how to use AI safely, gain confidence, and build new habits as they weave it into their everyday work.

The firms creating the greatest value from AI are not necessarily the firms deploying technology most quickly. More often, they are the firms recognising the criticality of investing in the skills, confidence and capability needed to build their AI foundation.

Introducing The Copilot Success Roadmap

Readiness

- Assess your existing security and data compliance, technical configurations and policies
- Establish your GenAI policies and principles to guide people on acceptable use within your firm
- Discovery and planning workshops to align business vision and objectives

Mobilise & Inspire

- Build the project team, identify your sponsors and recruit your champions
- Educate Sponsors, Champions and project team around possibilities, to maximise buy-in
- Discuss overcoming resistance and cultural barriers to aid developing your comms and engagement strategies
- Inspire your teams through an Art of the Possible workshop

Proof of Value

- Deliver bespoke training program to introduce Copilot features
- Engage champions to help identify use cases across practice and business support groups
- Create a Copilot Center of Excellence to support collaboration and sharing wins
- Extend training to an Early Adopter group to measure effectiveness

Deployment

- Ensure a clear communication plan is in place
- Showcase use cases developed through your PoV to inspire
- Ensure a minimum commitment from every individual as part of the rollout
- Leverage your champions to evangelise and positively reinforce your GenAI rollout

Continuous Success

- Continually assess adoption through the Microsoft Adoption metrics and surveying
- Ensure feedback loops exist to constantly share success and challenges
- Maintain the Center of Excellence with fresh content to promote engagement and new features
- Develop capability to surface up agentic and automation opportunities to fuel the next phase of AI maturity

Not a traditional IT project.

A structured organisational change journey that helps firms build lasting AI capability.

The Copilot Success Roadmap helps firms move from uncertainty to proof, from isolated enthusiasm to firmwide adoption and from early gains to continuous success.

The first stages of the Roadmap are designed to replace assumption with evidence. It helps leadership teams make informed decisions about investment, deployment and the capabilities their people need.

What the Roadmap does

Readiness

Establish the governance, security and organisational foundations for successful adoption.

Mobilise & Inspire

Build sponsorship, Champions and organisational momentum.

Proof of Value

Replace assumption with evidence through real legal and operational workflows.

Deployment

Scale adoption through relevance, learning and peer advocacy.

Continuous Success

Sustain momentum, strengthen capability and identify future opportunities.

What successful adoption creates

✓ Time unlocked for higher-value work

More capacity for client work, strategic priorities and professional judgement.

✓ Better quality and consistency

Stronger first drafts, clearer communication and more consistent ways of working.

✓ Faster client responsiveness

Quicker access to information, faster turnaround times and more informed responses.

✓ Improved employee experience

Less friction, less repetitive administration and more time spent on meaningful work.

✓ Greater digital confidence

Building practical AI capability across lawyers, business services teams and leaders.

✓ Governed and responsible use

Innovation supported by clear principles, controls and professional oversight.

✓ Future readiness

A stronger foundation for automation, agents and broader AI-enabled transformation.

Proof in practice

From uncertainty to proof

A structured Proof of Value programme helps firms test Copilot in real legal workflows, gather evidence and make informed decisions about wider adoption.

Why firms choose Stridon

We understand how law firms work

Law firms are not generic businesses with generic technology needs. AI adoption must account for client confidentiality, regulatory obligations, partner dynamics, professional judgement, utilisation pressures and knowledge-intensive work.

.....

We build proof before scale

Structured Proof of Value programmes give leadership teams evidence, grounded in real legal and operational workflows, that they can trust before making wider investment decisions.

.....

We create momentum through people

Sponsors, Champions and peer-led learning help AI adoption become part of the culture rather than remaining a technology initiative.

.....

We help firms sustain value after go-live

Our **Continuum** programme strengthens adoption through Champion communities, onboarding, enablement and adoption insight. Our **Advance** programme helps firms identify future opportunities around automation, agents, knowledge applications and wider AI transformation.

Ready to turn Copilot into lasting value?

Whether your firm is exploring Microsoft 365 Copilot, preparing for rollout or looking to sustain momentum after deployment, Stridon can help.

Start with a Copilot Success Roadmap conversation.

We'll help you understand where you are today, where value is most likely to emerge and what it will take to turn AI adoption into measurable impact across your firm.
